

November 2023

To Cupsaw Lake Members:

As we head into the winter months at Cupsaw Lake the CLIA Board has formed two committees to work on refining, reviewing, and recommending specific policies for the use of water movers, and for boats/watercraft on our lake.

Specific to lakefront property owners, any type of water movers that you may have installed in the lake must be removed by December 15, 2023. The removal of the water mover will help to ensure that ice, which may form near your lakefront property, is safe for anyone ice skating on the lake. The CLIA Board will be tasked with reviewing all committee recommendations for installing any type of water mover into the lake and will vote on those recommendations soon.

For the overall membership, the Boat/Watercraft Committee will provide the CLIA Board with recommendations or potential policy changes regarding the rules and regulations of boating on Cupsaw Lake.

Thank you,

Paul N. Scutti
President
Cupsaw Lake Improvement Association
